Went Over the Half-Million-Dollar Mark.

A wire to General Manager D. C and E. W. Griffith, well known to the mining fraternity here, are in the city from Goldfield. Mr. Robertson is on his way east and Mr. Griffith is here for a few days on personal business, and both out to boom Goldfield.

"Goldfield," said Mr. Robertson. "is terday without trouble, it is now left without the \$5,000 a month that it had without the \$5,000 a month that it had without the sounds of the kinks rapidly. It is the biggest gold camp in the country.

ments from 5 cents to 3 cents a share this mouth. While the company is undoubtedly earning the amount posted yesterday without trouble, it is now left without the \$5,000 a mount that it had been receiving from the May Day company; through its ownership of one-half of the stock in that corporation, so that it itself would be justification enough for the company to trim its regular distributions down as stated.

But, in addition to the loss entailed through the May Day's dropping out of the list of dividend payers, the Unche Sam company is now up against a bad silver market and a lead market that is wavering. Under these chroumstances the directors have reached the conclusion that it can to strengthen, rather than deplete, its treasury reserves.

NORTH AMERICA COMPANY—
TO SEND SHAFT DOWN

Manager Charles Morrison of the North Morrison of the May Day's the kinks rapidly. It is the the country, the biggest gold camp in the country, the country, the biggest gold camp in th

Manager Charles Morrison of the North America Mining company's properties, bear Heela, down in Beaver county, is in town purchasing supplies and equipment for the mine, after a trip to the coast. He states that he is going to camp anolighi for the purpose of awarding a contract to sink the shaft lowest down the full another 106 feet. This shaft is now down thirty feet and, while the better ore showing is in the other one, the location of the one now to be operated is better for gaining depth in the formation, while it is a certainty that when the contact between the black and the grade shoot will be opened. The ore that it is expected to develop in this shaft runs up to 80 per cent lead and nearly 100 ounces silver, with good values in gold.

"The company is getting into fine shape financially," said Manager Morrison, "and there is no longer any question about the complete development of the property, we have the goods, all right, and we are now getting into splendid shape to open the mine.

Stocks in San Francisco.

mission between now and the end of the year and the entire plant will be tuned up to "concert pitch" and made to do its work as planned in the beginning. As indicated by the figures given, the ly approximating 52,000,000 pounds per

annum. It now looks as though the company might easily produce copper The week on change opened with the market lively and prices uniformly strong and buoyant. There was a little shading 275 at 22c; 2.500 at 25c; 1,900 at 25½c; 75 at 20c.

MARK THIS

THE BARGAIN OF BARGAINS UTAH COPPER

In the terrific bull market now under way, "Coppers" will become first favorites, both for investors and specu-

The cheapest copper of any, bar none, is Utah Copper, now selling at \$47. It is cheaper today at \$47, under existing conditions, than Amalgamated would be at \$30: yet Amalgamated is in urgent demand at \$88. I say this simply to state fact, for I am a bull on Amalgamated at \$90.

Conditions, metal and marketwise, which will cause Amalgamated to sell at \$100—I believe it is on its way to over \$120—will cause Utah to fly to \$75, then mount to over \$100. Both are large enterprises, established and staple. Amalgamated is representative of old methods; Utah Copper of new. Amalgamated is deep mining. with an underground city continuously calling for millions annually for timbering, air, unwatering and hoisting. Utah is the representative of the newly perfected process of above-ground, steam-shovel, manufacturingproposition copper mining.

Amalgamated's product costs 10 to 11 cents.

Utah's costs 8 cents.

Every day Amalgamated continues production first costs increase.

Every day Utah continues production first costs de-

Bear in mind, my opinion is disinterested. I have no hand in the management or control of Utah. Bear in mind I am a terrific bull on everything. Bear in mind, I was the only one who dared to go unqualifiedly on record before election in a world-wide flung advertisement predicting to the minutest detail just what has eventuated from the election-politically and marketwise.

I unqualifiedly, unreservedly advise the 25,000 stockholders in Amalgamated to exchange at least a portion of of their holdings in Amalgamated for Utah Copper, even up to an even-price exchange.

In this advertisement I am pointing to one of the opportunities of the age-an exceptional opportunity. Paste it up and see if every day which goes by during the coming six months of the present terrific bull market does not prove the soundness of the above.

P. S.—There are 750,000 shares of Utah. It is active in the stock exchanges of the leading markets. It is a dividend-payer. It is known by representative financiers of Paris and London. In publishing this advertisement throughout Europe I particularly call the attention of Europeans to the exceptional worth of this copper stock. Europeans can have their orders filled through any of the stock exchanges' houses of Europe or America.

THOMAS W. LAWSON

This advertisement appears everywhere and will probably at once add \$20 per share to the present price.

Boston, Mass., U. S. A., November 9, 1908.

at the rate of 5,000,000 pounds per month next year, and it is pretty safe to say that its profits will not fall below 7 cents a pound. That will mean net earnings of \$350,000 per month, or \$3,600,000 a year.

per cent copper. We cannot say that we have are dropping indicates that we are dropping into one. We are following the ore down to determine what we have got. That done, we shall send the tunnel area of the same of t

Mr. Berry was asked what he knew about a new strike in the Mountain Lake and he replied that while it was under-stood that a constant improvement was taking place at the face of the Steam-boat tunnel, he did not know that a body of ore had been opened up there.

General operations at the Prince mine are moving along at a rapid rate, and continual development work is accomplished with each shift. The force of men is soon to be increased. Ore bins are finished and everything in readiress for starting the first shipment from one of the big producers of the Pioche district, says the Pioche Record.

William Lloyd states that the matter of wagon hauling is being considered, and shipment to the Ploche depot is favored against that of Panaca, if satisfactory rates can be had by parties hauling by team.

Things all through the mine are in good shape, and the immense ore bodies are looking fine. It was currently rumored on the street this week that twelve four horse teams would begin hauling ore after the election, but we are not able to verify this report as yet.

W. A. Clark went all through the Prince mine Wednesday on a tour of inspection.
